

John K. Yoo, MD

A Strong Medical Background

"Ear, Nose and Throat as a specialty is actually very challenging. ENT is a good marriage of non-surgical and surgical problems, meaning we treat a lot of things that don't require surgeries. Even with conditions that may require surgery, we always look at non-surgical options first."

Dedicated to His Profession and His Patients

"When seeing patients. I will avoid interrupting you. Listening to you and your concerns is a very important part of your evaluation. I'm never in a rush to get to another patient. And, I treat patients like they're my family members."

Enjoying the People and the World Around Him

"Sometimes I like to joke that I don't have a life outside of medicine. But on those occasions, I'm not practicing medicine, I like to spend time outdoors and with family. I really like to hike, especially in our national park system. I've been to Volcanoes National Park in Hawaii, Yosemite, Grand Tetons, Glacier National Park, The Grand Canyon, and of course Guadalupe Peak and Big Bend here in Texas."

There is No Place Like Practicing in Texas

"I've lived my entire life in Texas. I love the people in Texas. Everyone is so very nice and helpful. When the city had a natural disaster (such as Hurricane Harvey in 2017), Texans were out and about doing what they could to help one another. And I can tell you having spent some time in other parts of the country, it is not like that everywhere."

Experience

- Fellow, American Academy of Otolaryngology - Head and Neck Surgery
- Fellow, American Academy of Otolaryngic Allergy (Fellow)
- Member, American Academy of Sleep Medicine
- Member, American Rhinologic Society
- Member, Texas Medical Association
- Member, Harris County Medical Association

Education
