

Laura J. van de Laar, MD

A Top Medical Education

“As an ENT, I treat patients both medically and surgically. After completing my ENT training, I decided to further my surgical skills by completing a fellowship in Sinus and Skull Base Surgery at Vanderbilt University. While I see patients with various ENT concerns, this gives me the ability to offer a specialized skillset to help better treat sinus patients.”

Personalized Care Tailored to You

“I strive to make my patients feel comfortable by providing patient education during the visit. I believe the more informed and involved you are in your healthcare decisions, the more likely you are to feel confident in the treatment plan and therefore have the best possible outcome.”

Wouldn't Want to Practice Anywhere Else

“I love this city. I have lived here for most of my life and completed my medical school and residency training in the Texas Medical Center. The people and culture are what makes Houston great, and I am very lucky to practice in what I consider my hometown.”

Dedicated to Making You Feel Your Best

“My father was born with a cleft palate and deaf in one ear, which I think contributed to my interest in ENT. I was able to see firsthand how ENT issues can affect people's day-to-day lives. Because of this, one of my goals is to improve my patient's quality of life. I understand how listening and addressing concerns of my patient can make a big difference in their outcomes.”

Membership

Member, American Academy of Otolaryngology
