

Sanjeev Shah, MD

A Lifelong Dedication to Medicine

"I decided to become an ENT because it focuses on some of the most intricate, complex, and interconnected areas of the body and involves the senses we use to interact with our world. In addition, it allows me to treat adults and children both medically and surgically, often in minimally invasive ways."

Active in His Profession and With His Patients

"When you come to see me, you'll have a doctor who listens to what you say and treats you as an individual with unique needs. I'll always try to explain your problem in a way that's thorough yet easy to understand and partner with you to create a treatment plan."

Practices Evidence Based Medicine

"I believe it is important for me to know the most up to date guidelines and clinical research relating to a variety of ENT conditions. Patients deserve a doctor who not only has a strong foundation of knowledge and technical skill but is also staying up to speed on the ever changing field of medicine."

Treating You from a Unique Perspective

"Growing up in Sugar Land gives me a unique perspective into the backgrounds and lives of my patients. I enjoy the cultural diversity and feel a strong sense of connection to the community my patient's and I call home."
